

I am trying to hide certain menu categories from showing up in the main menu bar. This Example shows a drop down news menu on the top menu bar. It contains certain categories that I do not want the general public to see, such as coming soon 3, etc.

The image below displays settings in the admin area for those same categories, where I have tried to block them from public viewing.

ID	ICON	TITLE	SEF URL	MANAGER	ORDER	OPTIONS
10		<a href="#">Breaking News</a>	<a href="#">breaking-news</a>	Everyone (public)	1	  
7		<a href="#">Regulations</a>	<a href="#">regulations</a>	Everyone (public)	3	  
1		<a href="#">Technology</a>	<a href="#">technology</a>	Admin	4	  
5		<a href="#">Toxic-Chemicals</a>	<a href="#">toxic-chemicals</a>	Everyone (public)	5	  
2		<a href="#">Trees Over Solar Farms</a>	<a href="#">save-trees</a>	Admin	6	  
3		<a href="#">coming soon 3</a>	<a href="#">3</a>	No One (inactive)	7	  
6		<a href="#">coming soon 6</a>	<a href="#">6</a>	No One (inactive)	8	  
8		<a href="#">coming soon 8</a>	<a href="#">8</a>	No One (inactive)	9	  
9		<a href="#">coming soon 9</a>	<a href="#">9</a>	No One (inactive)	10	  

So any suggestions on how I can block the public from viewing those categories in the front end, would be appreciated.  
Thanks
